Microsoft Dynamics CRM

U.S. Address Validation

EASI's Address Validation for Dynamics CRM provides real-time U.S. address validation for CRM 2011. Powered by the United States Postal Service, our module retrieves information in real time from their database.

The screenshot shows a CRM account form with the following fields:

- General:** Account Name*, Primary Contact, Account Number, Parent Account, E-mail, Main Phone, Other Phone, Fax, Web Site.
- Address:** Address Type, Address Name, Street 1 (4543 Post Oak Place Drive), Street 2, Address 1: Street 3, City (Houston), State/Province (TX), ZIP/Postal Code, Country/Region, Phone.
- Shipping Method** and **Freight Terms** dropdowns.
- Description** text area.
- A green checkmark icon and the text "Validate Address" are visible at the bottom of the address section.

Users provide an incomplete or inaccurate street address along with the city and state information and our module will provide a complete and valid suggestion.

The dialog box titled "Address Validation -- Webpage Dialog" displays a table of suggested addresses:

Address 1	Unit	Address 2	City	State	Zipcode
<input type="checkbox"/> 4543 POST OAK PLACE DR			HOUSTON	TX	77027-3160
<input type="checkbox"/> 4543 POST OAK PLACE DR			HOUSTON	TX	77027-3160
<input type="checkbox"/> 4543 POST OAK PLACE DR STE 232			HOUSTON	TX	77027-3103
<input type="checkbox"/> 4543 POST OAK PLACE DR STE 217			HOUSTON	TX	77027-3103
<input type="checkbox"/> 4543 POST OAK PLACE DR STE 230			HOUSTON	TX	77027-3114
<input type="checkbox"/> 4543 POST OAK PLACE DR			HOUSTON	TX	77027-3115

A "Cancel" button is located at the bottom right of the dialog box.

In addition, our address validation will provide multiple suggestions when addresses for multi-tenant facility, such as an office building or apartment complex, are partially entered.

For a free 30-day trial, contact us at sales@easiintl.com or go to our website (www.easiintl.com) and select CRM Address Validation under Customizations on the menu bar for additional information.
